ABOUT ME

I'm a versatile web developer with a strong focus on creating intuitive user interfaces. Proficient in both front-end and back-end technologies, adept at leveraging a diverse skill set encompassing HTML/CSS, JavaScript frameworks (such as React Js), and server-side languages like Node.js and Python. I have the ability to build scalable and interactive web applications that prioritize performance and user engagement.

EXPERIENCE

- Front End Development** **2019-current**
Moboroid Software House **2020-2023**
I have over three years of rich, hands-on industry experience in front-end development. Through hands-on projects, I've mastered the art of transforming designs into functional, user-friendly websites. I've remained committed to delivering seamless and visually appealing web solutions
- Mern Stack Development**
Over the past one year, my journey as a MERN stack developer has been an exhilarating blend of learning and innovation. From designing and implementing robust backends with Express.js and Node.js to creating captivating user interfaces using React, I've embraced the full spectrum of MERN stack technologies.
